

I Wish I Knew How To ...

*Program Word 2010-2016
with Xojo in Windows*

January 2019 Edition (2.5)

By Eugene Dakin

Table of Contents

Chapter 1 - Introduction to Xojo and the Environment	10
Preview of Chapter 1	10
What is Xojo?.....	10
Describing and Defining the User Interface	11
Setting the run-time properties	14
Chapter 2 – Word Files.....	17
Word Terms.....	17
Adding the Plugin	18
Create New Word File	18
Open an Existing Word File	19
Control an Existing Open Word File	20
Closing Documents in Word.....	22
Close Word Without Saving	23
Brute Force Closing of Word	24
Open With Password.....	24
Save As PDF	26
Save As HTM.....	27
Save UTF-8 File	28
Open UTF-8 File	31
List Open Word Documents	37
Open Document Search	39
Close Searched Document	42
SaveAs Dialog	46
Chapter 3 – Modifying Body Text Data.....	49
Adding Text.....	49
Changing the Font Type, Size, and Bold	50
Changing Font Italics, Strikethrough, and Shadow	52
Underlining Text.....	53
Type of Underline	53
Underline a Specific Word	55
Underline Colour	56
Text Superscript and Subscript.....	58
Text Colour	59
Background Colour	61
Text Animation	62
Highlight Text	64
UnHighlight Text.....	65

Chapter 4 - Selection/Movement	67
Select All Information.....	67
Start of Document	69
End of Document.....	71
Page Header	73
Page Footer	74
Beginning of Line	75
End of Line.....	77
Move Up Two Paragraphs	78
Move Down a Paragraph.....	80
Chapter 5 - Paragraphs	82
Justify Paragraph Alignment	82
Get Outline Level.....	84
Set Outline Level	86
Indents.....	87
Paragraph Spacing.....	92
Page Break.....	94
Count Paragraphs.....	95
Chapter 6 - Table Of Contents	97
Basic Table of Contents	97
Advanced Table of Contents	99
Refresh	102
Chapter 7 - Editing	105
Finding and Selecting Text	105
Replacing Without Selecting Text	108
Replacing While Bolding Text.....	111
Inserting Text.....	113
Insert Text Before	113
Insert Text After.....	115
Selecting Text	116
Select Text and Brackets.....	116
Select Text within Brackets	118
Delete Text and Brackets.....	120
Add Brackets to a Selection	123
Chapter 8 - Pages	125
Insert Breaks.....	125
Chapter 9 – Tables	126
Create a Simple Table.....	126

Table Autoformat	129
Populating a Table	132
Count Table Rows and Columns.....	134
Select Cells in a Table	136
Select a Single Column	138
Select Multiple Columns	140
Select a Single Row.....	142
Select Multiple Rows	144
Change Cell Shading Color.....	147
Colour Key Words.....	149
16 Million Colours.....	150
Change Cell Texture	152
Cell Borders	155
Select a Single Cell	159
Basic Math.....	161
Get Table Cell Value	164
Sorting a Table.....	166
Table Cell Shading	170
Add Picture in Table	172
 Chapter 10 – Insert	 174
Inserting a Picture or Clip Art	174
Insert Shapes	176
Insert SmartArt.....	180
Insert a Chart (Advanced)	187
Insert a Hyperlink	190
Insert a Bookmark	192
Go To a BookMark (Word 2010 or Newer)	193
Delete a Bookmark.....	194
Insert a Page Number.....	195
Insert Page X of Y.....	197
Insert a Textbox.....	199
Insert a Dropcap.....	201
Insert Date and Time.....	203
Insert a Symbol.....	206
Insert an Equation	208
 Chapter 11 – Printing in Word	 210
Print Preview	210
Print Directly to the Printer	211
Getting Printer Settings.....	213
Page Margins.....	216
Getting Page Margins.....	216

Setting Page Margins.....	218
Page Orientation	219
Paper Size	220
PrintOut (Partial)	223
 Chapter 12 - Page Layout.....	 227
Add a Watermark	227
Page Background Colour	228
Tab Stops	230
 Chapter 13 - References	 234
Insert a Footnote.....	234
Insert an Endnote	237
Insert a Caption	238
 Chapter 14 - Mail Merge.....	 241
Letter Mail Merge	241
Creating an Excel List for Word	241
Create a Mail Merge Letter	250
Preview Mail Merge Result	253
Print a Mail Merge Run	257
Label Mail Merge.....	261
Envelope Mail Merge – Not Available (Bug)	265
Partial Envelope Mail Merge.....	268
 Chapter 15 - Envelopes (No Mail Merge)	 271
Creating an Envelope	271
 Chapter 16 – Content Controls	 274
CheckBox	275
ComboBox	277
Date Control	279
Drop-Down List.....	281
Picture	283
Plain Text	285
Rich Text	287
 Index.....	 290

Adding the Plugin

A plugin is required to add the necessary commands and functionality of Microsoft Office to Xojo. Here are the instructions on how to install the plugin after installing Xojo.

- 1) Go to the file folder C:\Program Files (x86)\Xojo\Xojo 2013r1\Extras\Office Automation and copy (Ctrl-C) the file MSOfficeAutomation.rbx
- 2) Go to the file folder C:\Program Files (x86)\Xojo\Xojo 2013r1\Plugins and paste the file MSOfficeAutomation.rbx
- 3) Close Xojo and restart Xojo

That's it!

Create New Word File

Start a new project by starting Xojo or press the following '*File - New Project... - Desktop Application - OK*'.

Next, double-click Window1 to open the Window.

Add a BevelButton by dragging and dropping a Built-In Control and placing in the center of the Window.

Double-click the BevelButton and add the following Code:

Code 1. Create and Open New Word Document (OpenWord2-1. xoyo_binary_project)

```
Dim Word as new WordApplication //Create a new Word variable
Word.Documents.Add             //Add a Document to the Application
Word.Visible = True            //Show the Word Application

Word = Nil                     //Set the object to Nil

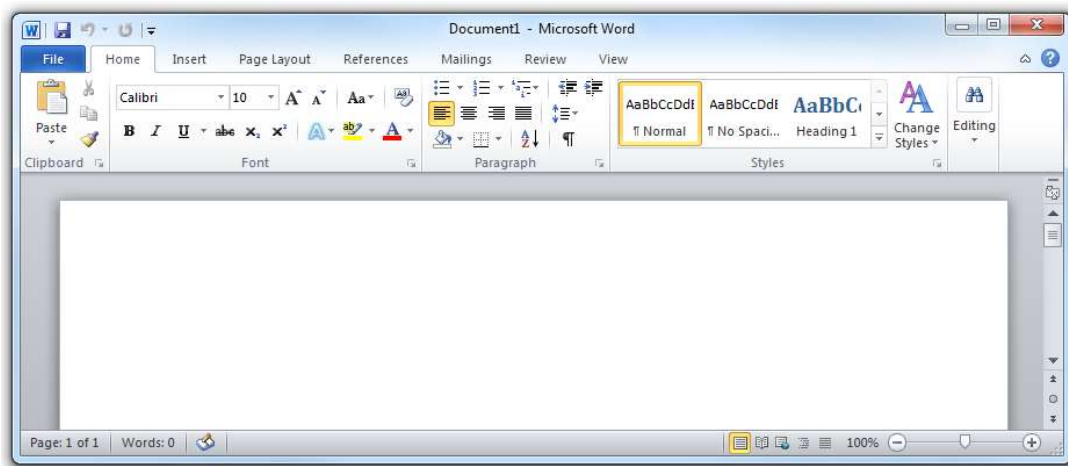

Exception err as OLEException  //Check for an error
MsgBox err.message             //display the error
```

Press the 'Run' button in the Xojo IDE and a new Word file is automatically opened. This example is provided in the Chapter 2 folder called *OpenWord2-1. xoyo_binary_project*. If your program does not open a new Word file, make sure you have Word installed. A free Word viewer from Microsoft is located at <http://www.microsoft.com/en-us/download/details.aspx?id=4>. The latest version is Word Viewer 2007.

The first section creates a new object in Xojo. A word document is created which is the blank page in word. The next command sets the word program to 'visible', so that the user can view the application. By keeping in mind good programming practices, when closing the program all objects should be set to Nil. Lastly, we trap errors if some form of error occurs.

Below is a screen shot of a New Word Document with the title "Document1".

Figure 10. View of a New Word Document Created with (OpenWord2-1. xojo_binary_project)

Open an Existing Word File

In many businesses, most of the documents are stored and kept in Word Documents. One of the many reasons for programming with Word in Xojo is to be able to gather the data from many documents (hundreds or thousands of documents) without changing the data.

To create the Xojo program which opens an existing Word document, add the following code to a pushbutton or bevelbutton.

Index

- 16 Million Colours, 150
- Add Brackets to a Selection, 123

The 'I Wish I Knew' series contains technical data and advice that makes sense and contains practical and numerous examples with explanations to allow you to ease into the steep programming curve. You can create Microsoft Word documents today!

This book "I Wish I Knew How to ... Program Word 2010-2016 with Xojo in Windows" builds a strong foundation of programming with Word.

This book is written as a guide and reference to Xojo programmers who program Desktop Applications in Windows. There are no dynamic link libraries (dll), COM, or Active X parts to add, and there is a plugin. Examples work with the new Microsoft Word 2010, 2013, and 2016 (docx) file format. Word is an alternative to the many available reporting programs.

There are 16 chapters and contains over 300 pages with over 100 example programs.

Examples include files, text modification, printing, tables, and more. Many screenshots have been added to show the results of the code with an index to help find topics quickly.

This is one of many books at xDev Library. This book can be purchased at <http://xdevlibrary.com/> where many great Xojo resources are available.

Happy programming!

Eugene

Eugene Dakin MBA, Ph.D., P.Chem., is an author of Xojo and Real Studio reference materials and has many years of experience in the programming industry. More great reference books are "*I Wish I Knew How To ... Program Excel with Xojo in Windows*" and "*I Wish I Knew How to ... Program Access with Xojo Desktop Apps in Windows*".
